Graduate Engineer Role

We are seeking a graduate engineer to join our production team at the Ballinode site in Co. Monaghan. The graduate engineer will carry out the "nesting development project" under the mentorship of the Continuous Improvement Engineer. The project goals are to improve quality, cutting times, programming time and material utilisation of laser cutting facilities with primary focus on machine programming. They will also give daily engineering support to the production team. Upon successful completion of the project, the role will extend to future projects relating to improving processes within McAree Engineering.

The Applicant

Qualification

A level 8 degree in Engineering is essential (Electronic, Mechanical, Mechatronic, Manufacturing or related) is essential graduating in 2016 or 2017 with a grade of 2.1 or higher.

Other Requirements

This person should have a high level of mechanical reasoning and spatial awareness. They will be expected to use initiative and drive their project but also be comfortable working in cross-functional teams. They should be willing to get involved in hands on work on the production floor. This person should already have some technical ability in both a 2D and 3D CAD packages and a strong ability in reading technical drawings. An ideal candidate would have some work experience in an engineering role e.g. internship or summer work.

Beneficial

Hands on electrical or mechanical skills would also be a benefit. Programming skills in any of the following would also be of benefit (CNC, SQL, VBA, C, Java)

Remuneration

Competitive salary.
