

McAree Engineering Ltd

CNC Machine Operators – Weekend/Holiday Cover

One of Ireland's leading Sheet Metal Fabrication Companies, McAree Engineering are looking for Part time weekend CNC Machine Operators to join their team. The company is based across two sites; Ballinode and Carrickroe, in Monaghan and currently employ 120 people. These positions will be based in Ballinode.

In addition to offering an outsource sheet metal fabrication business, McAree Engineering also operate a Mechanical Engineering Projects facility and manufacture V-Mac silos – their own brand range of agricultural, biomass and waste water treatment bulk storage solutions.

Due to continued growth McAree Engineering are seeking to grow their sheet metal operations team. These specific roles will provide weekend and holiday cover and would suit students currently studying for a mechanical engineering career.

The Role:

- Operate top of the range Trumpf CNC Lasers, Press brakes and associated metal processing equipment
- To meet agreed Production & Quality targets according to customer demands.
- To suggest continuous improvement/best practice solutions.
- To adhere to all Company Health & Safety requirements.
- Ability to read and understand technical drawings essential.
- Ability to work as part of a multicultural team.
- Practical understanding of safe methods of work.

The Ideal Candidate will have:

- Technical competency is essential
- Ability to read and understand technical drawings
- Excellent communication skills.
- Be 18 years of age

Shifts will vary and we will work with selected candidates, but typically a Friday and/or Saturday and occasional Sunday attendance will be required

Training will be provided over the summer months when weekday attendance will be required.

Apply in writing with a CV to jobs@mcaree-eng.com
